Care instructions: When lighting your candle for the first time, allow to burn for a minimum of 2 hours or until there is a completely molten wax pool. This will ensure good burn performance and minimise instances of 'tunnelling'.
For best results, burn your candle for at least 2 hours but no more than 4 hours at a time. Burn in an area free from draughts $\delta$ keep wax pool free from debris such as match heads. Allow the wax pool to solidify completely before relighting the candle. Keep wicks trimmed to 5 mm at all times to avoid smoking. Stop use when 10 mm of wax remains. Never leave a burning candle unattended. Keep out of reach of children and pets. Keep away from flammable materials, overhanging objects and polished surfaces. Never put in a warm place as this can cause the candle to overheat. Keep a minimum distance of 10 cm between burning candles.
