This light fixture is classified
as Class I(Earthed)

WARNING

- Electricity can be dangerous.
- Disconnect the power supply at the fuse box before installation.
- Installation must be carried out by a competent person.
- If in any doubt consult a qualified electrician.
- Installation must comply with current local and national wiring regulations.

CHILD SAFETY

- Do not allow children to tamper with the product.
- Keep packaging out of reach of children.

INSTALLATION

- Take care when handling and installing to avoid damage to the product.
- Remove all parts and hardware from box along with any plastic protective packaging.
- Do not discard any contents until after assembly is complete to avoid accidentally discarding small parts or hardware.
- Avoid mounting the fitting on a damp surface such as newly painted or plastered area. This may cause discoloration of the finish.
- When installing and whenever acting on the appliance ensure that the power supply has been switched off.

CARE INSTRUCTIONS

- Wipe clean with a soft, dry cloth or static duster only.
- Always avoid the use of polishing agents, water, harsh chemicals or abrasive materials when cleaning as they may cause damage to the fixture.
- Always switch off the electricity supply before cleaning.

TOOLS REQUIRED (Not Supplied)

- Cross Head Screwdriver
- Flat Head Screwdriver
- Pencil
- Drill
- Insulation Tape

1

Remove the fixing screws and mounting bracket (B) from ceiling cup and retain for later use.

2

Using the bracket (B) as a template, mark and drill fixing holes in the ceiling.
Due to the variety of different ceiling types Soho Home cannot provide you with the exact fittings needed to fix this product to the ceiling. Different materials require different types of fittings.

3

Attach the bracket (B) onto the ceiling using suitable fittings.
You will need to choose fittings that are specifically suited to the ceiling type and material you have. If you are unsure about what type of fittings to use please consult your local hardware store and/or qualified tradesperson to get the appropriate fittings.

4

The height of the drop may be adjusted prior to electrical installation.
1). Loosen the plastic cable retaining screw located on the underside of the ceiling cup with a correctly sized screwdriver.
2). Gently pull the excess cable through the ceiling cup until the desired length is achieved. moving the cable grip (C) to reach the cable outlet.

Retightening the plastic screw to secure the cable in place. Any excess cable should be neatly tucked away into the ceiling void.

5

Connect the supply wires to the terminal block (D), opposite the corresponding wires from the fitting. Ensure that connections are tight and no loose strands of wire are left out of the connector block.

6

Use the fixing screws (B) provided to secure the fitting to the pre fixed bracket (B) ensuring that the fixing points can bear the total weight of the fitting.

7

Insert the specified light bulb into the lampholders.
DO NOT EXCEED THE SPECIFIED WATTAGE.

8

Secure the shade (E) over sockets in a clockwise direction until tight.
Ensure threads are properly aligned before tightening by hand.
DON'T OVER TIGHTEN!
